Rupendra Dhungana

Kathmandu, Nepal | +977 9745571603 | dhunganarupendra69@gmail.com | linkedin.com/in/rupendradhungana | github.com/Rupendra247

Professional Summary

Second-year BSc (Hons) Computer Science with Artificial Intelligence student with hands-on experience in backend development, database configuration, and REST API design using Python, FastAPI, SQLAlchemy, and MongoDB. Skilled in implementing authentication, CRUD operations, and debugging across full-stack applications, with additional experience in machine learning and data analysis. Seeking the IT Intern role to contribute to backend development and AI logic implementation under experienced mentorship.

Education

Sunway College 2025 – Present
BSc (Hons) Computer Science with Artificial Intelligence – 2nd Year, In Progress *Maitidevi, Kathmandu, Nepal*

South Western State College Jul. 2021 – Nov. 2023
+2, Management (Computer Science & Mathematics) *Basundhara, Kathmandu, Nepal*

Technical Skills

Backend & APIs: FastAPI, REST APIs, SQLAlchemy, JWT, bcrypt, Postman
Frontend & Frameworks: React, Node.js, Express, Flutter, Tkinter
Databases: SQLite, MongoDB
Data & Machine Learning: Python, Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, Machine Learning Fundamentals
Dev Tools & Deployment: Git/GitHub, Docker (basic), Linux/Command Line (basic), Render

Projects

Finance Tracker API | *FastAPI, SQLAlchemy, SQLite, JWT, Postman* finance-tracker
- Built a REST API for personal finance tracking (income, expenses, budgets) using FastAPI and SQLAlchemy ORM with SQLite.
- Implemented JWT-based authentication and bcrypt password hashing, debugging token and endpoint issues during development to secure user access.
- Manually tested all endpoints using Postman, covering core CRUD and auth flows.

Scribbly – Notes App (MERN Stack) | *MongoDB, Express, React, Node.js* scribbly-cnnq.onrender.com
- Built a full-stack notes application allowing users to create, edit, and delete notes, using MongoDB, Express, React, and Node.js.
- Independently configured and hosted the application on Render, handling both frontend and backend deployment.

Hospital Management System | *Python, OOP, Tkinter* hospital-management-system
- Designed a Hospital Management System applying inheritance to model distinct Doctor/Patient roles, encapsulation to secure sensitive medical data, and polymorphism to handle department-specific billing logic.
- Prototyped a basic Tkinter interface for managing patient records, doctor schedules, and appointment bookings.

Student Analytics: Social Media & Academic Performance | *Python, Machine Learning* student-performance-analysis
- Analyzed a dataset of 705 student records to evaluate relationships between social media usage, sleep quality, and academic performance.
- Built and evaluated machine learning models to identify patterns between social media usage, sleep quality, and academic performance.

Ames Housing Data Analysis (EDA) | *Pandas, NumPy, Matplotlib, Seaborn* ames-housing-analysis
- Performed exploratory data analysis on the Ames Housing dataset, including data cleaning, correlation studies, and visualization.
- Identified OverallQual and GrLivArea as the strongest predictors of sale price through correlation and multivariate analysis.

Smart Attendance Automation (Team Project) | *Flutter, College Team Project* smart-attendance-automation
- Identified inefficiencies in the college's manual, paper-based attendance process and proposed an automated Flutter-based alternative as a team project.
- Built the Flutter front-end interface and coordinated with teammates to integrate it with the backend attendance-tracking logic.

Certifications

DataCamp: Python Programming, REST API Development
freeCodeCamp: Relational Databases
Kaggle: Introduction to Machine Learning
HackerRank: Python, Problem Solving
Other: Data Science & Analytics, Intermediate Python, Elements of AI
